Enhanced data management

All devices within the LUVAR series allow for the user to have access to an extended overview of the therapy and efficiency data.

For comprehensive evaluation, the therapy and compliance data of the last 365 days is available via the heyer medical analysis software.

Silent therapy operation

With only 30dB, LUVAR series offers a silent therapy operation in a new compact design even at its maximum flow rate.

Comprehensive data management

Alarm clock

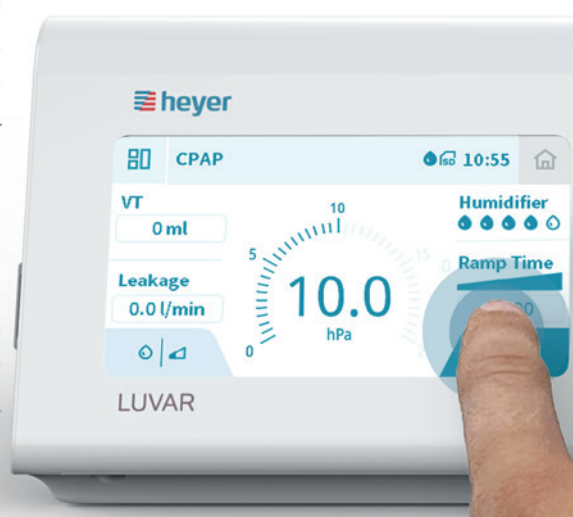

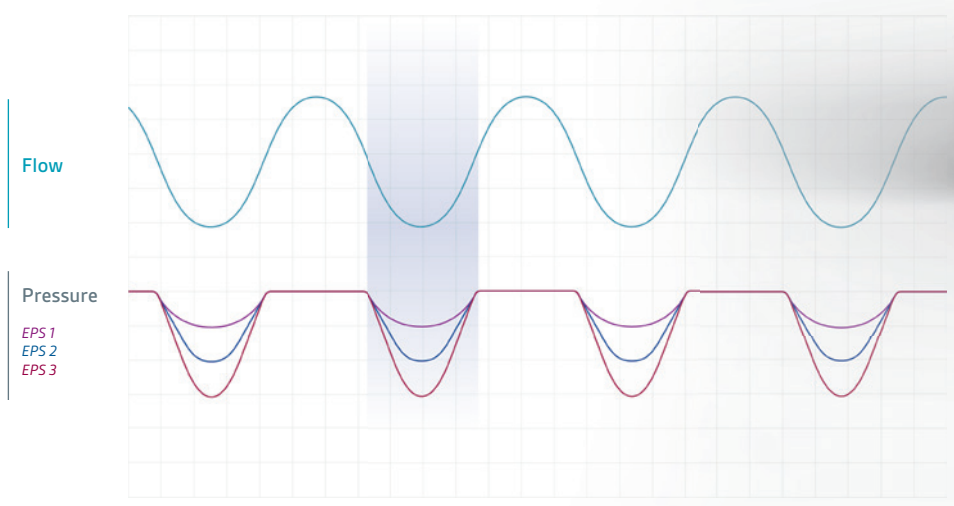

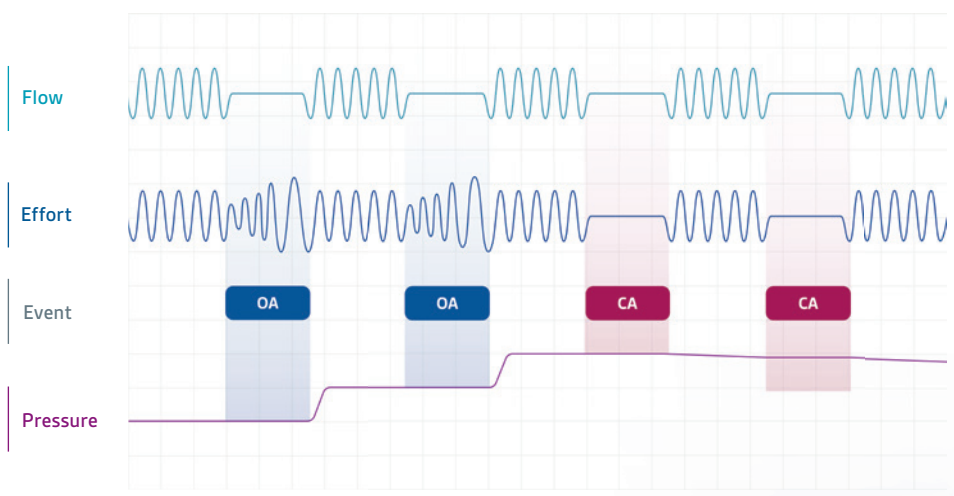

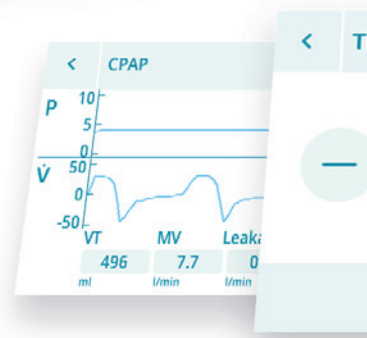

Smart operation

Enhanced air filter system

Compatible with most masks on the market

Individual user comfort

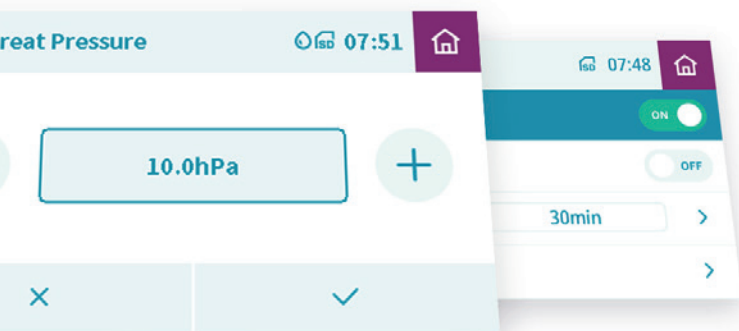

LUVAR series enable individual and user adjusted sleep therapy. The breasyflex option ensures particularly gentle and pleasant therapy adjustable in CPAP and APAP therapy.

The APAP and AutoS mode are available for the automatic adaptation of the necessary therapy pressures for the individual user needs.

Intuitive device interface

LUVAR series has the typical heyer intuitive interface, allowing for very user friendly and intelligent handling with a large colour LED display.

 Easy Touch-control
