1883

HEYER was founded in 1883 by the mechanical engineer Carl Heyer in the famous spa-town Bad Ems.

1886

In 1886, HEYER developed the first inhalation system and established a inhalation facility for respiratory treatments in Bad Ems.

Goldene Medaille BADEN-BADEN.

1896

In 1896, HEYER's respiratory systems and patents have been awarded by the Gold Medal in Baden-Baden / Germany for innovative products.

1900

In the early 1900s, famous contemporaries, like the Czar of Russia, Kings of Belgium and Norway came to Bad Ems to join the HEYER inhalation therapy

1910

In the 1910s, expanded the product portfolio by various aerosol and oxygen-inhalation systems.

1920

In the 1920s, Carl Heyer jnr. took over the management of HEYER and modernized the products.

1937

In 1937, HEYER's new factory was established in Bad Ems and is still today the place of operation.

1954

In 1954, developed the first portable compressor-operated inhalation system – HEYER Piccolo.

1963

In 1963, the new product line of HEYER Anesthesia Units was established. In 1968, the first portable ultrasonic nebulizer HEYER USE68 was developed.

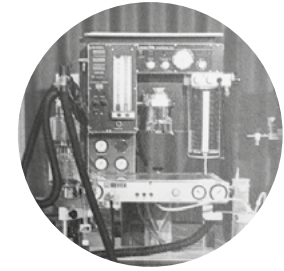

1969

In 1969, HEYER established the Sekundant product line – Breathing Therapy And Ventilation Systems suitable for all patient categories including infants.

1982

In 1982, launched HEYER's fully modular anesthesia systems with integrated ventilator based on latest quality and safety standards.

1980 - 1990

During the 1980s and 1990s, expanded the product portfolio of anesthesia systems to meet individual needs of the markets.

1987

In 1987, to honor the merits of our company, the city of Bad Ems dedicated a street to HEYER and named it Carl- Hoyer-Straße.

2001

In 2001, contracted with US-based monitoring manufacturer DATASCOPE to provide HEYER anesthesia systems for the US- market under DATASCOPE trademark. Production transferring and licensing from Germany to USA in 2005.

2021

In 2021, heyer medical AG provides millions of IVD products for European area, fighting against COVID-19.
